

MEMORANDUM Planning Division – PZ Memo No. 14-056

DATE: AUGUST 6, 2014
TO: PLANNING AND ZONING COMMISSION
THRU: JEFF KURTZ, PLANNING ADMINISTRATOR
KEVIN MAYO, PLANNING MANAGER
FROM: SUSAN FIALA, CITY PLANNER
SUBJECT: PDP14-0005 FAIRVIEW MEDICAL PLAZA

Request: Preliminary Development Plan approval of a phased medical office development
Location: Southeast corner of 94th and Fairview Streets, north and west of the northwest corner of Dobson and Pecos roads
Applicant: Kevin Fawcett, Cawley Architects

RECOMMENDATION

Planning Staff, upon finding the request to be consistent with the General Plan, Santan Area Plan, and Planned Area Development zoning, recommends approval subject to conditions.

BACKGROUND

The approximate four acre site was zoned in 2009 as Planned Area Development (PAD) Multi-Use for Assisted Living, Nursing, and General/Medical Office uses as part of a nine acre development. The south five acres was developed as Sante Chandler, a Transitional Rehabilitation Center. The subject site consists of two phases for medical office which is consistent with the approved PAD land uses.

The site is located at the immediate southeast corner of 94th and Fairview streets. The Stonegate Village apartments are to the north, Via De Cielo condominiums are west of 94th Street, Sante Chandler is south, and east is vacant property planned for additional medical and general office and commercial uses as part of the Santan Area Plan.

### **SITE LAYOUT**

Phase I consists of the east portion and Phase II is conceptually designed for the west portion of the site. Planning Staff will review Phase II administratively for substantial conformance with the PDP.

The site is arranged to address the needs of the patients through a linear layout of buildings, landscape, and parking. Buildings are pushed toward the Fairview Street with the majority of parking internally. As indicated by the ownership, the patients are recovering from brain, spinal, and other conditions which require the need for uncomplicated routes and orientation to entrances, exits, and parking. A patient drop-off is located adjacent to the courtyard entry leading directly into the medical office building.

The original zoning case included a vehicular and pedestrian connection between the south and north parcels. The driveway cut was constructed from the Sante Chandler development to this site with a pedestrian walkway connection. The ownerships of Fairview Medical development and Sante Chandler request that the connection no longer be required due to the operational needs of the facilities and patients. Planning Staff agreed to the removal of the driveway and pedestrian connection with the stipulation that the Fairview Medical development team remove and reconstruct the driveway cut and pedestrian access.

### **ARCHITECTURE**

The two phases each consist of one, single story building. Phase I is fully illustrated in the Development Booklet. Phase II is conceptual with design elements, including materials and colors, carried over from Phase I. Final details of Phase II will be reviewed administratively by Planning Staff.

The architectural style is a modern design utilizing a series of horizontal planes connected with linear components. The main entrance is the south elevation which features an entry courtyard, water feature, and seating. The 'internalized' entrance furthers the operational needs of the medical office uses by minimizing visual and distance conflicts for patients. Design elements such as cantilevered window canopies, recessed windows, and a modulating roofline provide both vertical and horizontal articulation. Materials include stucco, metal panels, stained wood, steel, and concrete and split-faced block with a complementary earth-toned color scheme. Additional details can be found within the attached Development Booklet.

### **SIGNAGE**

The request includes a sign package that includes building mounted signage, freestanding monument signs, and multi-tenant signage. Building mounted signage includes reverse pan channel lettering. The monument and multi-tenant signage utilizes similar materials and colors as those used on the buildings to further create cohesiveness.

### **DISCUSSION**

Planning Staff supports the request, finding it to represent a quality medical office development and a compatible addition to the surrounding hospital area. The uses are consistent with the

Santan Area Plan. The site layout and architecture are sensitive to the nearby residential developments through building location, pedestrian access, and scale.

**PUBLIC / NEIGHBORHOOD NOTIFICATION**

- This request was noticed according to the provisions of the City of Chandler Zoning Code.
- A neighborhood meeting was held on July 10, 2014. One person, representing Sante Chandler, attended and inquired about the south access driveway and pedestrian connection to their property.
- At the time of this writing, Planning Staff is not aware of any formal opposition to this request.

**RECOMMENDED ACTION**

Planning Staff, upon finding consistency with the General Plan, Santan Area Plan, and Planned Area Development zoning, recommends approval of the Preliminary Development Plan request subject to the following conditions:

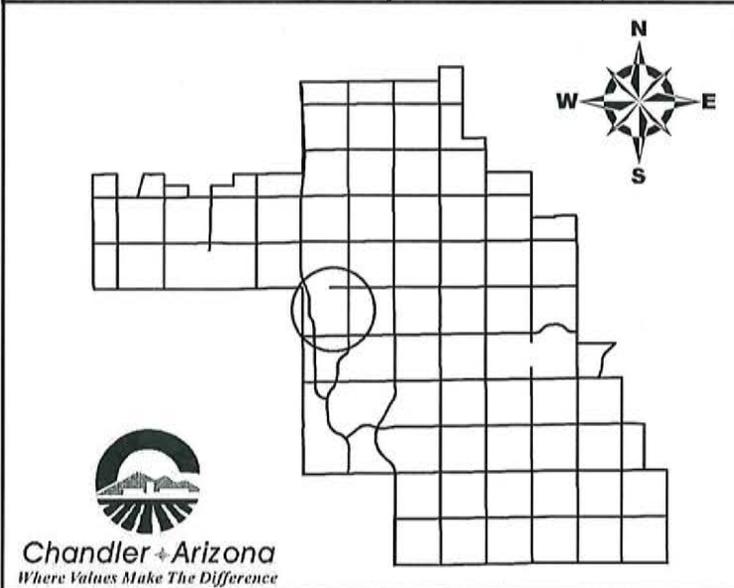

1. Development shall be in substantial conformance with Exhibit A, Development Booklet, entitled "FAIRVIEW MEDICAL PLAZA", kept on file in the City of Chandler Planning Services Division, in File No. PDP14-0005, except as modified by condition herein.
2. Compliance with original stipulations adopted by the City Council as Ordinance No. 4174, in case DVR09-0011 SANTE CHANDLER, except as modified by condition herein.
3. The vehicular curb cut and pedestrian connection located on the Sante Chandler property shall be removed and reconstructed by the Fairview Medical development as part of Phase I.
4. Landscaping along 94<sup>th</sup> and Fairview streets shall be installed as part of Phase I.
5. The landscaping shall be maintained at a level consistent with or better than at the time of planting.
6. The landscaping in all open spaces and rights-of-way shall be maintained by the adjacent property owner or property owners association.
7. All buildings shall be designed to be consistent with the level of quality, detail, building material, paint colors, architectural articulation, and the like as established in the attached Development Booklet.
8. Sign packages, including free-standing signs as well as wall-mounted signs, shall be designed in coordination with landscape plans, planting materials, storm water retention requirements, and utility pedestals, so as not to create problems with sign visibility or prompt the removal of required landscape materials.

**PROPOSED MOTION**

Motion to recommend approval of PDP14-0005 FAIRVIEW MEDICAL PLAZA, Preliminary Development Plan for a phased medical office development, subject to the conditions as recommended by Planning Staff.

---

06/24/2014

To whom it may concern:

This letter is written in reference to the development of the Fairview Medical Plaza at 2233 West Fairview Street, Chandler, Arizona, 85224. This project is currently under review for Preliminary Development Plan approval prior to submission of permit ready construction documents later this summer. As one of the owners of this parcel and the future medical office building in phase one of the project, I am writing in reference to a specific issue associated with this development that will have a direct effect on my ability to run a safe and successful business at this location.

It is my understanding that the previous development to the south of our parcel (Sante Chandler) submitted a master site plan that anticipated a pedestrian and vehicular connection between our two projects. I believe that this plan was approved assuming that a somewhat analogous use would be installed on our parcel and, to a degree, that is correct.

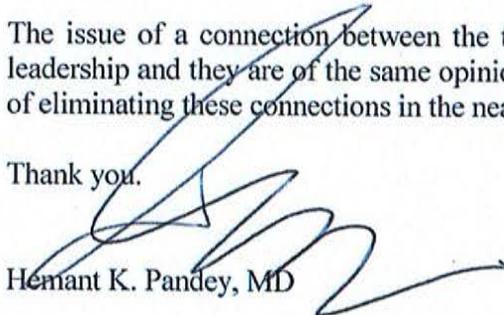

Unfortunately, not all medical uses benefit from the development of a medical "campus". In this case, my practice provides care for patients with dementia, traumatic brain injury, stroke, and many other neurological conditions which are similar. Many of my patients have limitations of their cognitive capacities and are therefore easily lost. You'll note that we have instructed our design team to provide dedicated drop-off areas for this very reason.

A requirement by the City of Chandler to maintain a pedestrian path or vehicular way to the Sante Chandler project presents a threat to the welfare of our patients. These connections can create confusion in directing patients to the right practice. It is for this reason that I must request that City staff reconsider their requirement to join these two parcels in this manner.

The issue of a connection between the two parcels has been discussed with the Sante Chandler leadership and they are of the same opinion. I believe that they will be preparing a letter in support of eliminating these connections in the near future.

Thank you.

**Re: New Project Development - Fairview Medical - SEC of 94<sup>th</sup> Street & Fairview Street, Chandler AZ**

To Whom It May Concern-

It has come to the attention of Santé of Chandler, located at 825 South 94<sup>th</sup> Street, Chandler AZ, that the land parcel directly adjacent to our north is being developed for a medical use, which we support. The proposed site plan for the approximate 4 acre site is below:

Immediately to the right of the yellow star on the site plan above is an existing drive from Santé of Chandler going north into the proposed development.

We believe that this direct connection to the new development is unnecessary and that any thru traffic will not benefit either user. We would like to see the new development continue forward without linking to our existing drive.
